## Be **SMART**

The best defense against thefts is a good offense. Most thefts are a crime of opportunity. If you remove the opportunity you can decrease the chance of becoming a victim!

### Vigilance

Be aware of your surroundings at all times, especially when entering and exiting your vehicle as this is when you are the most vulnerable. If you feel something may not be right, leave the area, report it, and return at a later time.

### Keys

Remember to take your keys with you when leaving your vehicle. Thieves consistently look for vehicles with the keys left in them as this makes stealing your vehicle as easy as possible.

### Lock

Remember to lock your vehicle each and every time you exit. Unlocked vehicles give thieves easy access to your belongings and are consistently targeted. Keeping doors and windows of your home locked at all times is also a great practice at deterring thieves.
